SPRING OF 1959

Choice Gladiolus . . . The Best of Recent Introductions

TWO EXCELLENT NEW VARIETIES for 1959

GOLD BRAID—A very tall easy grower, easily the largest yellow you can grow. Round saucer shaped flowers measure 6 inches across. The large light yellow florets are beautifully waved and frilled at the edges, lip petal is deeper with some red deep in the throat. Makes quantities of large bulblets that will bloom. Opens well from a fairly tight bud. Large 50c; Medium 35c Small 25c. Bulblets 10 for 50c. 10 medium bulbs for \$2.50; 25 bulbs in mixed sizes for \$5.00; bulblets a pint \$20.00.

SUGAR ELL (Ernie Vennard—Originator's Description.)—Sugar Ell is sometimes called a coral colored glad, but for me it has been a fiery salmon, with a slightly deeper throat color. It will open five or six blooms from its 18-19 bud spike, and will hold up well for days in water. It is 432 class here, but sometimes reaches 500 size on West Coast, so I am informed. It propagates liberally, and the bulblets grow very easily, making many twos and threes. Requires about 105 days to bloom, but here in Iowa it comes along when most other glads are gone, and blooms freely until heavy frost. (A large stock permits a low introduction price, which is as follows: One bulb, 75c; three bulbs, \$2; ten bulbs for \$5; 25 bulbs for \$10. May be had in mixed sizes if desired. Anyone purchasing \$5 worth of bulbs may have 50 bulblets for \$5.

1959 Introductions Are Prepaid.
